SALARY CALCULATOR · SAVE THIS

# ₹12 LPA offer ≠ ₹1 lakh a month.

CTC is what the company spends on you.
In-hand is what reaches your bank.
**Here's how to work out the gap.** 👉

STEP 1

# What's inside your CTC

| | |
|---|---|
| Basic salary | usually the biggest part |
| HRA | house rent allowance |
| Special allowance | the balancing figure |
| Employer PF | goes to your PF account |
| Gratuity | paid only after ~5 years |
| Variable / bonus | depends on performance |
| Insurance, perks | not paid in cash |

The last 4 lines are **not in your monthly salary.**

STEP 2

# What gets deducted monthly

| | |
|---|---|
| Employee PF | often 12% of basic |
| Professional tax | small, state-wise |
| Income tax (TDS) | depends on regime & slab |

**QUICK FORMULA**

Monthly in-hand ≈

**(CTC – employer PF – gratuity – variable – perks) ÷ 12**

– employee PF – professional tax – TDS

STEP 3

# Ask HR these before you accept

❓ Fixed vs variable: how much is guaranteed?

❓ Is PF on full basic or capped?

❓ Is the joining bonus clawed back if I leave early?

❓ When is the variable paid, and how is it decided?

❓ Will you buy out my notice period?

Always ask for the **salary breakup** in writing.

NEGOTIATE SMARTER

# Compare offers by in-hand, not CTC.

Coming soon on our Digital Resume: put your expected CTC and notice period on one link and stop answering the same HR questions.
